

Angled _Sconce

Angled is an indoor sconce with a ceramic diffuser, handmade in Italy. The prismatic surface creates a soft, decorative light effect. The metal frame is painted white, while the diffuser is available in three matte finishes: white, gray, and black. The LED light source features TRIAC dimming and allows selection of the color temperature between 2200 K, 2700 K, and 3000 K, adapting the lighting to different project requirements. The protection rating is IP20 and installation requires direct mains connection. Its compact size and horizontal layout make Angled suitable for corridors, entrances, headboards, and lounge areas, both in residential and contract interiors. The diffused emission and handcrafted ceramic allow the lamp to function as both a practical lighting solution and a decorative feature within the project.

- LED
- dimmable
- IP20
